SUMMARY

Senior Full Stack Engineer with 8 years of experience building enterprise SaaS for HRTech and healthcare. Own the Recruitment and Candidate Management domain at Logezy, a multi-tenant platform serving ~300 organizations, 300,000 users, and ~100,000 daily active users. Led a three-engineer team, shipped weekly production releases, collaborated directly with UK clients, and built LLM-based resume parsing, compliance validation, and candidate matching. Core stack: TypeScript (NestJS, Node.js, React, Angular, Vue.js), PHP/Laravel, PostgreSQL, MySQL, Redis, RabbitMQ, Docker, and AWS.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React, Next.js, Angular, Vue.js, HTML, CSS

Backend: NestJS, Node.js, Laravel, REST APIs, GraphQL

Mobile: Ionic, Flutter (personal projects)

Databases: MySQL, PostgreSQL, Redis, Elasticsearch

Cloud: AWS (EC2, S3, RDS, ECS, Fargate, API Gateway, Elastic Beanstalk, Secrets Manager)

DevOps: Docker, Git, GitHub Actions (CI/CD), Linux

Architecture: Microservices, Multi-tenant SaaS, Event-driven Systems (RabbitMQ), Distributed Systems

AI: LLM Integration, AI-powered Automation, RAG Prototyping (LangGraph)

PROFESSIONAL EXPERIENCE

Logezy Infosystems

Senior Full Stack Engineer

Full Stack Engineer

PHP Developer

April 2019 – Present

Jan 2024 – Present

Apr 2021 – Dec 2023

Apr 2019 – Mar 2021

- Architected and led the Recruitment & Candidate Management domain of a multi-tenant HRTech SaaS platform serving ~300 organizations and ~100,000 daily active users.
- Designed and implemented REST APIs and microservices supporting recruitment, scheduling, and compliance workflows across the platform.
- Led a team of 3 engineers within a 13-member engineering organization; mentored junior developers and ran architecture and code reviews.
- Worked directly with UK clients to gather requirements and deliver business-critical features for healthcare workforce management.
- Built AI-powered recruitment automation: LLM-based resume parsing, automated compliance validation, and candidate matching using multiple LLM providers.
- Improved application performance and optimized backend workflows for high-traffic services.
- Delivered weekly production releases using Agile practices and CI/CD pipelines (GitHub Actions).

Smartwebin

PHP Developer

August 2018 – March 2019

Kochi, Kerala, India

- Built custom web applications, CRM systems, e-commerce websites, and admin dashboards for client businesses.
- Implemented backend features and database schemas using PHP, CodeIgniter, and MySQL, with jQuery, HTML, and CSS on the frontend.

SELECTED PROJECTS

Logezy Core Web Application & Agency Portal

- Multi-tenant HRTech SaaS platform and agency portal for recruitment and workforce management.
- Built recruitment features, REST APIs, microservices, and shift-scheduling capabilities.
- Stack: NestJS, Laravel, Vue, Angular, MySQL, AWS.

Logezy Candidate Mobile Companion App

- Cross-platform mobile app for candidates with offline-first GPS attendance, push notifications, and timesheets.

- Stack: Ionic, Node.js, PostgreSQL, FCM, AWS.

Logezy Smart CV Parse & Auto-Match Engine

- AI-powered resume parsing and candidate matching engine integrated with multiple LLM providers.
- Automated compliance validation and candidate matching to reduce manual screening.
